

# Support Access to Medication Abortion at Your Campus Student Health Center!

California university students deserve access to medication abortion. Senate Bill 24 (SB 24), also known as “The College Student Right to Access Act,” would mandate all California public universities to provide medication abortion at student health centers by January 1, 2023. Currently, students face many barriers—financial and otherwise—when seeking reproductive healthcare services; SB 24 expands access to these services for students by providing medication abortion right on campus! Show that students support expanding reproductive healthcare services on campus and sign our petition to urge that student government take a public stance in support of SB 24.
